

PERMEABLE RESPONSE

High-speed rail proposal to reclaim, reconnect & regenerate the Sacramento - San Joaquin Delta through infrastructure, architecture & phyto-remediation

High Speed Efficient Rail

Connects people and goods throughout the vast delta region using sustainable rail transportation.

Water Research Platforms

Mobile laboratories along the length of the rail provide as-needed water monitoring and testing.

Water Resource Education

The structure supports spaces for learning about the delta and water conservation in California.

Delta Habitat Restoration

Constructed wetlands grow along the base of the rail lines to mitigate high pollution levels.
