Van Alen Institute and the City of North Miami are looking to identify new ideas for flood-prone vacant lots in the community. The goal is for these ideas to help protect this incredible community from flooding while providing culturally relevant recreational space.

### TOP DESIRED ADDITIONS TO THE NEIGHBORHOOD

- Community Garden
- Plants and Greenery
- Walking Paths
- Traffic Solutions
- Dog Park
- Traffic Related
- Lack of Greenspace
- Access to Transportation
- Community Programming
- Playing Sports
- Watching TV
- Biking
- Reading
- Walking or Running

### TOP CONCERNS IN THE NEIGHBORHOOD

- Lack of Greenspace
- Safety
- Traffic Related
- Access to Transportation
- Lack of Greenspace

### WHERE RESPONDENTS LIVE AND WORK IN NORTH MIAMI

- West North Miami: 16.6%
- Central North Miami: 41.7%
- East North Miami: 41.7%

### HOW OFTEN RESPONDENTS EXPERIENCE FLOODING AT HOME

- Frequently: 12.1%
- Sometimes: 16.5%
- Rarely: 25.2%
- Never: 46.2%

### AGES OF RESPONDENTS

- 18-24: 15.1%
- 25-34: 27.9%
- 35-44: 24.7%
- 45-54: 20.4%
- 55+: 2.2%
- 18: 9.7%

74% of respondents agreed that children and teens would benefit most from a space to recreate.

Prospective solutions: Community Gardens, Walking Paths, and Community Programming were the most desired additions to the neighborhood.
